Comments: Please expand the dispersed camping options. Free, rustic camping in the National Forest is one of the great things about Wyoming and America.

Please ban side-by-sides in Curtis Canyon. OHV rentals are ruining the peace and quiet which is the greatest resource of this area. They turn this very special wild place into a giant go kart track. The side-by-sides destroy the road and damage the vegetation. They roar through campsites disturbing peaceful campers, and make walking along the road extremely unpleasant because of the noise, dust, and dangerous driving. People need to learn to recreate in a way that doesn't destroy the experience of others. One side-by side is more disruptive than 50 hikers or campers.
