Comments: I am writing to insist that no logging take place in this forest. Not only is the land one of great beauty, but these trees are necessary to continue to sequester carbon if we are to escape climate catastrophe. There is no time for business as usual. It is a personal matter to all of us.

What will you tell your grandchildren when they ask why you did not protect their right to live on Earth?

If you need to learn more, read the latest IPCC report. Forests are necessary if we are to survive in the coming years.
