Comments: Please Move the new welcome center to the present bus parking lot; create a seasonal facility that can be operationally reduced or closed to match periodic or seasonal demand.

No food or beverage service in any of the facilities. Require there be no 'human food' brought to the area by all/any visitor.

All tour buses should load and unload in an improved bus lot; create an electric circulator shuttle to quietly and cleanly move guests to the view areas. Sensitively develop trails from the new welcome center/tour bus parking lot to encourage many visitors to walk to the view areas.

Private vehicle parking should be similar to that which is available now.

No motorized tour boats and docks on the lake/lakeshore should be in this expansion plan.

Many thanks for considering public comment.
