Title:
Comments: I am writing to support adding the new ten-mile section of
single-track motorized trail within the Railroad Saddle Restoration Project.
This area has seen much loss of motorized trails. Several trails now dead end arbitrarily and adding more single track will help tie in the trail systems. We've lost a lot of mileage to the Rapid River wilderness and this addition will help to supplement that loss. As well as hopefully start a trend of recovering our use of this area.
I clear hundreds of miles of trails a year and would love to help with any trail building and maintenance of this project as well.
