Comments: Good morning,

I understand the health and care it needs to take care of a national forest like the Bighorn National Forest. As someone who uses the mountains all the time, I am asking that USFS reconsider the area around Pole Creek and FS designated area 449 areas for their timber project. That area is heavily used by recreational skiers and snow-shoers alike during the winter, as well as by horseback riders and hikers in the summer. I worry that the project will be detrimental to the recreational use of the trails. I ask that you remove those 2 small portions from the overall project and formally designate them recreational areas for hiking and winter sports alike.

Thank you
