Comments: I fully support the gravel pit. I fully support having local gravel and tax dollars saved. I fully support having maintained and drivable roads because the county will no longer spend extra money and time (that they don't have) on getting gravel to our area. I know that the state has requirements and always follows through with those requirements. Once the pit is reclaimed, nature will grow back. We had a chance to have a pit on private property. I felt that that was much more ideal. I understand that finding a location is difficult and holds few options. Either way, I support this and I hope more come to see that this is much needed.
