First name: Danny

Last name: Hendrix

Organization: Pipeliners Union 798 Association

Title: Business Manager

Comments: Please find the attached comment supporting the Mountain Valley Pipeline as it seeks a permit to cross the Jefferson National Forest. I am proud to submit this on behalf of Pipeliners Local 798, a trades union representing the nation's most skilled and dedicated industry craftsmen who depend on critical infrastructure projects like MVP to provide for their families. Our members collected 2,270 signatures on the attached comment because they recognize that further construction delays are devastating to the local workers and communities that are depending on this project's tremendous benefits. Our members also understand that state and federal regulators have already thoroughly examined MVP's environmental impacts and safety measures, finding it is firmly committed to conservation and efficient, safe operations. On behalf of the dedicated members of Local 798 and all who support the Mountain Valley Pipeline, I urge the swift issuance of this and other necessary permits to ensure the long delayed completion of this critical project. Note: The attachment with 2,270 signatures will NOT be published to the reading room as it contains PII.
