Title:

Comments: I am the owner of residential land located just to the east of this proposed exploration. I intend to build a home there within 2 years and am opposed to this proposal for two reasons - 1) the concern over the effect on our aquifers in the area and it impacting our ability to obtain adequate and clean water, and 2) the considerable noise and disruption this project will cause to the many homes and residential areas within 1-2 miles of the proposed site. I request the USFS to reject this proposal.
