Title:

Comments: First, please, no boats. In a recent webinar one of the staff said that only 10 or 20 out of 400 comments received had supported the boat concept. I believe boats should be off the table.

Second, no development of the far side. Keep it remote access only.

Third, more trails, especially ski trails wide enough to be groomed. A bridge to the campground would be wonderful.

Fourth, put a welcome center close to the historical center, not on the pavilion site.

Fifth, no food anywhere. If the average visit lasts one hour, people won't starve.

Last, I asked a question about timed entry at one of the discussions, and was told that is a management decision that would come later. Considering that this whole effort is about dealing with surging attendance, I think the time is now to look at timed entry.

Thank you for the opportunity to comment.
