Comments: I could never express enough how strongly I oppose this plan of logging 12,000 acres of the Green Mountain National Forest. It is literally one of the most disgusting and disgraceful ideas that I have ever heard of. It makes me sick just to think about it. Just try to imagine the number of habitats that this will destroy for creatures who not only have a right to exist and thrive as humans do, but who science has proven to be essential to our global ecosystem. That is not even to mention the fact that this project will destroy a significant portion of the natural resource that produces oxygen, the very thing that we human beings as well as most other life forms need to perform the most basic action of survival: BREATHE! We cannot forget that trees remove carbon from the air too. We should be doing everything that we can to protect this beautiful, essential resource, not destroying it for nonessential economic gain. Our planet is dying, and this project will only contribute to its destruction. As someone who cares deeply about this beautiful planet that is our home and ALL forms of life that it has, I ask that this insane and ungodly project be cancelled at all costs! Do not cut down these trees! Not now, not ever!
