Comments: I cannot even believe this project would have access within a quarter mile of people's homes!
This is a wildlife refuge area including bald eagle habitat! People park at the gate on Wabash Springs and photograph the eagles. These animals were already displaced once when the trees were over-cleared and the forest became unrecognizable.
Now you want to drill 39-100 holes into our aquafers? Contaminate everyone's wells? Strip mine? Decimate mountains? All in our backyards?
Just stop!
Stop prostituting our public lands for profit!
