First name: Beth
Last name: Paulson
Organization: Elk Haven Vacation Cabins
Title:
Comments: No organization should be given any authority for exploration without doing environmental studies and providing in depth information to what happens before, during and after exploration. This is just one piece of the puzzle and will impact more than just this small community. This is not an exploration for viable energy minerals or anything else that is beneficial to this community or any other community in the area. This is public land, not private and wasting water resources whether purchased here or anywhere else is irresponsible considering we are still in a drought across the entire state. There is so much more to say about this project, but it absolutely should not be approved.
