Title:

Comments: Thank you. Regarding the new alternatives to the MGRA plan:

Glacier Spur Road Trailheads - Alt.#2

Mgt Unit Boundaries - Alt #4

West Glacier Trails - Alt #5

Dredge Lake Trails - Alt #5 (we use these trails a lot and live on their perimeter)

West Side Visitor's Center Complex - Alt. #1. Hard NO. I oppose building a west side visitor's center, especially on the lake. Motorized boats are not acceptable, the noise and increased activity would diminish everyone in the area's experience. Most visitors want a clear photo of themselves and the glacier and area surrounding it.

Photopoint is huge attraction and motorized boats and a visible or floating visitor's center would impact the "wilderness" experience for tourists and locals. Would this only be open and staffed half of the year benefitting the excursion industry and not consider the local people who use the area year around? This would be the most disturbing proposal of all to us.

Bridge across river - A pedestrian style bridge across the Mendenhall River connecting the campground area to the east side would be a great benefit and open up access to the whole area.
