Title:

Comments: I am writing to the US Forest Service regarding their plans to clear cut 12,000 acres of the Green Mountain National Forest. In the midst of a devastating Climate Crisis where trees are integral in eradicating global warming , I cannot as a citizen of this planet, understand why you would choose to commit this abomination. Have you no conscience? What about future generations? Our children and grandchildren will certainly bear the brunt of your reckless decisions. Please take the time to research and understand that your actions will have devastating consequences!!!
