Comments: I would to express my opposition to opening the Telephone Gap area of the Green Mountain National Forest to logging. This area contains large stands of mature forest that are vitally important to the local ecosystem, as well as storing carbon. The best use of this type of forest and all USFS lands is for recreation, carbon storage and wildlife habitat. This logging goes against the executive order issued by President Biden in 2022 and contradicts current best practices in land management. Please do not allow logging in this sensitive and biologically important forest.
