Title:

Comments: I support the Telephone Gap Integrated Resource Project. It is sited in an appropriate place for this sort of harvest & has been planned for years. There is no old growth timber standing on this site. The Opposition group "Standing Trees" is trying to give their interpretation of Joe Biden's order to obstruct this project. Vermont needs more areas of young forest for native & Neo-tropical birds that have been in decline. Please move forward with the project, we need it.
