Comments: I viewed your new additional projects for MGRA & parts of #6 are more inline with my desires for the area.

No motorized boats (& also no non-motorized boats) so all visitors & locals can enjoy the peaceful views (from shore) without people & boats in front of their picture & view. Another advantage of no boats is all visitors & locals can enjoy a more natural, peaceful & less commercial experience.

I like the idea of the new visitor center back in the woods, blending with the trees & not being a big eyesore.

The idea of a welcome center back by the bus parking lot with restrooms & electronic bus circular that is quiet & not polluting is a great idea.

Protecting the bears & other animals & birds should rank as most important along with keeping the area environmentally friendly. Nature trails are good. Please no wide paved trails & no cabins. View benches & some rain shelters along trails would be useful.

Thank you for viewing my comments & your desire to incorporate locals (who use the MGRA area often) ideas in your plans.
