Comments: I am writing to help preserve the beautiful forest that is Jackson Mountain . I came to live in Pagosa Springs for one reason only, the beauty of nature and the fresh air the rural Mountain town provides.

I have spent many hours on Jackson Mountain hiking with the Audubon Society engaged in citizen science. We have also worked with the Forest Service to remove unused barbed wire on the mountain to improve wildlife corridors availability.

I lived for 5 years on the intersection of two gravel roads in Pagosa. I know gravel is needed but this beautiful wildlife area is not the place.

Please consider what you will be destroying.
