Title:

Comments: I'm writing to protest the construction of the Mountain Valley Pipeline and the Equitrans Expansion Project Supplemental EIS #50036 in the Jefferson National Forest, which would further contaminate clean waterways, destroy dwindling natural habitat, and critically important carbon -removing trees. Constructing gas pipelines furthers our nations dependence on fossil fuels, contributes to global warming and diverts precious resources that are needed to be used to build energy infrastructure based on renewable resources. Cancel these pipeline & expansion projects! Save and protect our forests and dedicate yourselves instead to reversing course so as to reduce the impacts of such prehistoric climate disaster practices!

Sincerely,

Diana Bailey
