Comments: Do not cut or clear the Telephone Gap! This is not in Vermont's best interest-especially as we are in climate crisis. This action makes it worse. Do not look to old science vs current science.

USDA - you work for us--if you cannot act on current science --- the federal govt. should not fund offices that rely on old science.

Think of our children, grandchildren, and all of the next generations to follow. We owe it to them to stop and think.

Consider reading the book: The Overstory. Thank you for reading and pausing and standing up for what is right.
