Comments: I have read through the proposed actions and I agree with all of them. We need to close the dispersed sites and setup designated sites. The development of campgrounds is long overdue. In the example of Brown's/Raspberry Creek, this is exactly what is needed. A developed campground and the closure of most of the dispersed sites is needed. I live close to this area and I am often in there hiking the CT. The degradation I've seen over the last 8 years is incredible. Action needs to be taken now to prevent further loss of habitat.

It would help also to make the designated sites and campgrounds reservable on the web site [recreation.gov](https://www.recreation.gov). I think this would help to control the creation of new social created camp sites.
