Comments: I am protesting the forest service's proposal to log the Telephone Gap area in the Green Mountain National Forest. The Green Mountain National Forest is an old growth forest, and I believe this logging is not necessary and that it cannot be justified. This is a significant contributor to climate change. Isn't it time we really start taking actions to reverse it? Our greed as a nation has to turn around and this is the place to do it.

Please look at the service's outdated forest plan and reverse course on this proposal.
