Comments: I've previously commented in other years. Please save those comments and add these on. Thank you for the opportunity to comment.

- no boats on the lake.
  - electric circulator tourist busses from the Spur Road bus parking lot.
  - build the welcome center on Spur Road at the site entrance.
  - do not pave over the pond
  - do not expand commercial tour capacity:
- No development on the West Glacier trail other than a single track trail to the bluff.
- keep the campground as is, no cabins.
  - the Steep Creek/Spur Road pedestrian underpass is a bear accident waiting to happen. Keep pedestrians on the road for safety.
  - do not allow food sales, vending or personal food at the welcome center or on any trails. Keep the bears from habituating to tourists as snack food providers.
  - consider that CBJ's stated visitor industry plan is to limit cruise ships to 5 ships/day.

A plan for Mendenhall Glacier to accommodate 1.6 million visitors a year is overkill. I urge you to scale back the "build it and they will come" philosophy.

I support respecting the land, the lake, the access to Nugget Falls and West Glacier with minimal further development.

Respectfully,  
Jo Boehme
