Comments: I don't want this to become another Moab! Pagosa Springs is a big horseback riding area and we need to consider that. Building a few trails for mountain biking is one thing but putting in racecourses is not what we need to do. How is it that we have to jump through a bunch of hoops and spend tons of time and money to rebuild a short section of trail that should have been rerouted to begin with to an appropriate parallel above the low spot on Williams creek trail , but

Someone can go in and rip up miles of trail and destroy tons of live trees with a Dozer at the end of snowball road and not be accountable for it!!!!

Did the cattle guard on windy pass trail go through appropriately approved channels???

You need to Also consider how this is going to affect the outfitters and the hunters. If the areas are connected and developed to much it will run the wildlife out and the hunters will quit coming to our area as much. I believe that is a big yearly revenue for our whole town and for the DOW

There will also be some serious conflict with the bikers and the hunters in the fall

It feels like there is some underhanded behavior going on with this project?
