Title:
Comments: I was raised in Bennington, attended Lyndon State College and often travelled the roads of the Northeast Kingdom, central and southern Vermont. As a native Vermonter, hiker, skier and nature lover it is easy to cherish the natural beauty and serenity of the Green Mountains and all it has to offer. At a time when global warming is on the rise, we must protect the forests and their magnificent mature trees. Otherwise, they will be destroyed and disappear forever along with their capacity to process CO2 and help slow down the climatic change. If not for you or me, we must preserve the natural beauty and resources for our future generations. PLEASE stop the destruction of one our greatest resources by ending the Telephone Gap Integrated Resource Project. Thank you for your consideration.
