Comments: As somebody who has watched countless areas outside Denver go from being beautiful, wild places to watch wildlife, fish, or hunt to becoming a parking lot and mountain bike racetrack, please don't do this. There are enough places to ride bikes and walk in town already. Humans can make do with town places. The wildlife on the mountain cannot make do with less habitat. We can coexist with the wildlife, but not like this. Not forever. Please keep my children and grandchildren in mind when considering this. I want them to see the things I have seen.
