Comments: I am strongly against the Jackson Mountain Landscape Project as a resident of San Juan River Village

There have been a plethora of clear points made as to why this is not right location for this Project including:

- Wellness of existing and future residents - both physical (dust) and mental (noise) implications
- Safety concerns for broader public driving on 160 with so many trucks pulling in and out
- Lack of diligence on exploring the many options also proposed and lack of effort to do a real cost/benefit on multiple sites as it relates to existing residents and broader public
- Impact to wildlife patterns and devastation to the land used by many

Please do not move forward with this project - moving forward with this project indicates serious misjudgment and implies corrupt practices and partnerships given all the facts and discussions shared thus far.
