Title:

Comments: Please amend this trail plan to follow "Colorado's Guide to Planning Trails with Wildlife in Mind" and CPW's comment letter for this plan. Specifically removing planned trails within winter habitat and migration corridors on the north, west, and south sides of Jackson Mtn, and reducing trail density in the entire plan.

If this plan goes forward as is, it will set the precedent that illegal trails are not a big deal and will eventually be approved by the USFS. The USFS cannot maintain the thousands of miles of trails already in existence or enforce seasonal closures, much less manage more new trails. In my opinion, the USFS should be spending more time and resources maintaining existing sanctioned trails and closing trails that are not sanctioned.

Seasonal closures are only good on paper. Without identified funding to enforce the closures, they should not be allowed as an excuse to proceed with the destruction of wildlife habitat.

Thank you for your time and consideration.
