Comments: I am very concerned on what this project will do to our way of life. We live very close to the claims and are concerned with what this will do to our wells. Will they be depleted? Will they be contaminated? Will we have to listen to drilling 24/7 along with light pollution at night? Also, this is a beautiful area and it should stay this way. These companies can paint you a good picture, when in reality they will not honor what they say. We retired here to enjoy the peace and tranquility of the area. What will happen to that?? Will the traffic be increased with large trucks and machinery? Will we have light pollution ruining our beautiful night sky?
