Comments: I do not want our forest lands developed in this manner. It has more negative impacts than positive in my view. We can't support the amount of people/visitors/tourists in the area as it is, even the public restrooms have been taken away (such as Treasure Falls). You can forget "leave no trace" if this is approved. I have seen the "simple" version of what happens when an influx of people, mostly those who don't live here, come into the area.....littering and absolute disrespect of those of us who actually live here. Let them go to Moab....Pagosa simply can't absorb the amount of visitors this would bring in....we can't even find staffing for our restaurants and retail shops! I'm not against development but something of this magnitude is a whole different animal. And speaking of animals, just how do you think it will impact animals and stock users in general? Not good~
