Comments: I am opposed to officially developing an illegal trail on Jackson Mountain for the purpose of biking. CPW has already expressed concerns about this trail and cites declines in elk and deer populations that could be further impacted by this trail. We need to protect wildlife habitat from illegal molestation, but by developing an already existing illegal trail they will be further harassed. Also, this proposal rewards the illegal activity and could potentially encourage future actions similar to what brought this. Anecdotally, I have personally had hunts interrupted by Mountain bikers who saw my blaze orange, even though I was engaged in legal activities. Please do not go through with this project, developing more trails and gravel pits.
