Title:

Comments: The FS needs to be held accountable for encouraging mtn bikers who intentionally create new unapproved trails by not enforcing illegal trail building. The FS has to stop turning a blind eye to the negative impacts these illegal trails make to wildlife.

The FS has to collaborate with CPW in making decisions on where trails are allowed. These trails significantly impact elk and deer's migration paths and forcing them to move from their natural habitat.

Where does it stop with the NF in ignoring the public's abuse to our public lands. Incorporating illegal bike trails to the NF plans for the sake of convenience and lack of enforcement abilities is irresponsible and absurd.

The FS has to make this a priority for the sake of public use and more importantly conserving the protection of wildlife. After all, the FS are supposed to be the epitome of conservation.
