Title:

Comments: This project seems ill advised in an area where wildlife is already having trouble thriving. Will this project, the disturbance it will cause to wildlife and creating greater ease of access be helpful to elk and deer populations in the area? How will this area be managed and will there be resources available to enforce management and /or closures in this area in support of wildlife? Has there been any attempt to limit unsanctioned use in this area during sensitive times for wildlife and have local residents been abiding by any restrictions? These questions need real consideration before moving forward with a project of this scale and in this particular moment in which local wildlife is struggling.
