Comments: I would like to say that I don't think there should be a gravel pit at Jackson Mountain. Although there is some pros about having a gravel pit, there are equal to more cons about having a gravel pit. It would make it easier to get gravel because it would be closer. But there is no entrance ramp for the trucks to get speed before merging into traffic.

Also the nearest home to the gravel pit would be about 2,000 feet away which isn't the best thing to be around because of all of the noise. I am aware that the gravel pit would be easy access but for the reasons listed above, i don't think it would be the best idea. This concludes my opinion and wants for what i think should happen to Jackson Mountain.
