Comments: As a mountain biking enthusiast that loves downhill and the need for speed,I feel that having a downhill trail is very necessary. There are few trails in pagosa that is mountain bike only trails. If this trail is built, other recreationists could go to other trail systems without mountain bikers flying past them and getting in the way. Another trail system that is for other sports would be great. The gravel pit is a great idea. The amount of potholes in this town is a lot and lots of people would appreciate the less potholes.
