Comments: I Believe we need a gravel pit, however, could we place it some other place? I understand that it is a good place, but, I am a environmentalist, and I want this space for nature. The trails would not seem natural if there is a pit in the ground, and you hear trucks all the time. I know that I am in a class, and 3 people go for recreation, and 1 doesn't. I see some people have dirt roads with lots of potholes,

If we find another place, the potholes will be filled, and the people who hike, bike, horseback ride, and explore can do all of those thing without having the noises of diesel trucks drive nearby. The San Juan River Village will also be disturbed by the diesel trucks. For these reasons, I think we should find an alternate place for the gravel pit and I support the trails that are going in.
