Comments: I am not old enough to drive, but I believe that pot holes need to be filled and that our community needs gravel. However I do believe that Jackson Mountain is not an optimal solution. I often hike there with by grandparents and dog. This is beautiful land and the rumble of logging trucks and trucks going to the dig site would completely ruin the peaceful soundscape, Furthermore the increased smell of diesel and gasoline would destroy the smell of pine and oak. The Jackson Mountain gravel pit should be moved to a more available area.
