Comments: While I love to hike and do other recreational activities I personally have never been to Jackson Mountain. I understand the need for Gravel but I also know the negative effects of having the gravel pit located there. If we decide to add a gravel pit to Jackson mountain it will cause lots of traffic for people living in The San Juan River Village, trucks would be coming every 24 minutes and block lots of roads. On the other hand having the gravel pit would help us fill in potholes and create stronger roads. When dealing with this gravel pit we know that Jackson mountain had the best place for Gravel but we know there are other places that could be just as sufficient. Overall, I think that the pros and cons of this pit are very equal making it hard to choose, but with that being said I think the Gravel pit is a very beneficial thing.
