Comments: I support the making of gravel pits because if there is a lot of pots on the roads and people might keep falling into them with there car and might get stuck, and also they might not like it because that roads are so bumpy. So I agree that there should be a gravel pit so they can fill up the pots that are in the roads so that people don't fall into them with their car and might get stuck with their car because of the pots

. Also another reason why I support it because a gravel pit can also make a road smooth and not bumpy.
