Title:

Comments: Enough is enough. All across Colorado USFS/USDA has shown no interest in protecting anything. The tourist dollar is USFS/USDA altar of worship. The science is beyond clear in this and other instances. Yet USFS/USDA has repeatedly ignored science to advance its own agenda. USFS/USDA is ruining my state. Stop already. This isn't about more and more mountain bike trails. This is about conservation. Our elk herds are already suffering. Please do not allow this project to continue. Also please enforce existing law against illegal trail building. Thank you.

Carl Phillips
