First name: James

Last name: Thornley

Organization:

Title:

Comments: US Forest Service,

It is hard to understand how you continue to cause such destruction to the Earth as pure science continues to expand on the effects of what is happening to the planet during this climate CRISIS. Intact forests are a major factor in mitigation of this EXISTENTIAL threat. For the sake of your and my children, the planet as we know it, and all living things, please have the integrity and courage to accept FACTS and turn your agency into a forest saver instead of a forest destroyer.

James Thornley
