Comments: To whom it may concern,

We need to SAVE our OLD Growth forests for the carbon sink and for the wildlife habitat and for future generations.

DO NOT allow logging in this Vermont Telephone Gap project.

I don't need to make all the arguments. as you will listen to those better able to formulate each fact and reason, or you will ignore all of them. The best I can do is to speak up as the Lorax did for the trees.

We are watching and have been disappointed . I hope not this time.
