Comments: I want to thank the forest service for this proposal to change and protect this sensitive area.

The road to the Goodwin Lake trailhead has greatly deteriorated these past few years and the change to the trailhead is a great option.

The dispersed camping has greatly impacted this sensitive area so having established sites, an enlarged campsite and increased messaging will certainly help.

My concern is the increased OHV use which seems to be the biggest impact during recent summers. Unsure how to limit but increased education may help protect the road and respect other users. It seems the number of drivers is getting out of control but unsure what limits can be placed.

Wonderful that funding was received, and this sensitive area can be addressed.
