Title:

Comments: Having grown up and worked in these areas on several NFs before, I am becoming more disillusioned with most USFS logging projects. I have seen many, including some of my involvement, turn out poorly due to side effects, usually on the wildlife, fisheries, and watershed. Lately, I find effects on climate collapse more severe from USFS logging, and I call for a moratorium on logging. The driving opponent seems to be corporate interests and officers, with "profit NOW" their main priority.

Therefore, myself and the 40 organizations I support oppose the project. NEPA should be done in cooperation with Conservation Organizations, as the original Multiple Use Act enjoins. PERIOD!
