Title:
Comments: I strongly oppose F3's exploratory drilling. Any form of gold exploration or mining is a treaty violation. The United States government signed a treaty with Indigenous Nations that gives the Indigenous Peoples full decision-making on how that land is cared for. And mining does not care for it in any way.

Since I assume the US government won't uphold their contractual obligations to Indigenous Nations, and if it is determined that F3 can drill, both an environmental assessment and impact statement must be performed prior to drilling.

Don't let F3 into the sacred Black Hills.
