Comments: Thank you for moving quickly to address the impacts of unmanaged dispersed camping, especially bordering historic and wilderness areas as along the 390. The sooner the better, please. A related concern that may require additional management is the fourteener traffic - people speed in on weekend nights after dark and camp in their cars to summit Missouri et al., Huron (and increasingly the south side of La Plata) - they just pull in along the road if campsites are full. Thank you!
