Comments: I oppose the Forest Service's proposal to log in the Telephone Gap area of the Green Mountain National Forest for many reasons. Intact, mature forests are critical to mitigating climate change as they are an important carbon sink. Many species depend on contiguous forests for their survival. I enjoy the forest for recreational reasons. This operation would be a direct violation of President Biden's executive order that such forests should be preserved to reduce climate change and protect biodiversity. Please withdraw this misguided project.
