Title:

Comments: We live in Royalton, VT. We are skiers, hikers, campers, swimmers. We completed VT's Long Trail in 2015. We are now the caretakers of the planet at a time all realize we must pitch in to thwart climate disruption we see with our own eyes every day now, everywhere. Each tree keeps us alive by giving us oxygen and so much more. There is still PLENTY OF LUMBER available from private lands. PLEASE do not pursue this harvesting project. The very essence of living in VT is that strong and calming feeling our forests give us-fresh air, cool shade, wildlife, etc.
