Comments: I am writing in STRONG opposition to the proposed Telephone Gap logging proposal. Having hiked through this area numerous times using the Long Trail and side trails, I am very concerned about the negative impacts this proposal will have on the natural environment of Telephone Gap. In addition I am concerned about the effects logging in this area will have on the water quality in Chittenden Reservoir, and the overall negative impact on the climate the release of all of this old growth sequestered carbon will have. Please do not allow this logging proposal to go forward.
