Comments: I'm in favor of the overall objectives of the project, but I object to the time of the year that this project is scheduled to take place. I feel the timing of the work disrupts the winter sports activities tremendously and should have a work stoppage from December 15 thru April 15 of the following year. Unless the Forest Service is willing to adjust the eastern boundary of the Eagle Cap Wilderness, 3 miles to the west, to allow motorized access, I oppose the project. I feel the project, as proposed, would devastate the winter tourism of Wallowa County along with local winter recreational opportunities. Another concern I have as a result of the timing of this project, is the damage to the road that would occur running Logging Trucks on an already under maintained road surface.
